

SYNERGY

Copy and Print CD's and DVD's

4800dpi photo quality print

4 or 6 colour 'off-the-shelf' ink cartridges

Up to 100 discs per session*

Choose from 1 or 2 DVD±R drives

Simple operation

Synergy Pro – 2 drive CD/DVD Publisher

The **Synergy Plus** and **Synergy Pro** CD/DVD Publishers are all-in-one disc publishing systems which allows users to copy and print 50-100 professional looking discs in one session with easy hands free, unattended operation.

The Synergy Plus is configured with a single, high-speed DVD drive, while the Synergy Pro features two DVD drives. With their feature rich software, whichever model you choose, you can easily setup multiple burn jobs or rip music CDs with your favourite MP3 software such as iTunes or Windows Media Player all in a compact, attractive desktop unit. A 6-colour, 4800 photo-quality inkjet printer is also included in both models allowing users to print professional, photo quality graphics direct-to-disc for a truly professional finish.

The Synergy CD/DVD Publishers makes printing discs easy. With the Disc Studio™ Labelling software included, you simply send a print job and the Synergy will automatically insert a CD/DVD for printing. No additional software is required and you can also use your favourite labelling program if you prefer.

Another outstanding feature of the Synergy CD/DVD Publishers is that they use standard, "off-the-shelf" inkjet cartridges available at virtually any office products store. This means that users are not tied into buying expensive coded cartridges and the cost per print is a fraction of what other disc printers on the market cost. This provides the user with the most cost effective solution.
